Alberta Newspaper Publishers Send Resolution to Premier Protesting Unfair Attitude

Request Him to State Definitely Charges Against Newspapers of Which He Complains and to Take Action in the Courts.

The annual convention of Alberta division of Canadian Weekly Newspapers Association held in the Palliser hotel, Calgary, Oct. 9 and 10, was representative of the province, over 60 per cent. of the publishers being there, many accompanied by their wives. The daily newspapers were also represented, including the Lethbridge Herald, Mr. John Torrance, business manager, attending the sessions and who was a guest at the enjoyable social functions held in honor of the gathering of newspapermen.

The invitation of Senator W. A. Buchanan to hold the 1937 convention at Lethbridge and Waterton Park was read to the convention and warmly received, though action on deciding the place was left for the executive to decide at their meeting early next year. Mr. Torrance was introduced to the convention by H. T. Halliwell, first vice-president, and president elect for the coming year, who referred to the friendly spirit and co-operation of the Lethbridge Herald towards the weekly newspapermen, and expressed their appreciation of his attendance. Mr. Torrance in reply stated it had always been the policy of his paper to maintain cordial relations and co-operate to the fullest extent with the rural publishers, and hoped to have the pleasure of welcoming them to the sunny south for next year's convention. Lethbridge entertained the provincial convention in 1928, since when it had alternated between Calgary and Edmonton.

As an added incentive to produce better papers, Mr. Cecil Lamont, executive head of Grain and Milling Advertising Service Limited, Winnipeg and Calgary, offered to donate two trophies for annual competition for the papers adjudged as the best among the country weeklies, points to the total of 100 being based on news interest, typographical arrangement and display, press work and other details. A cash award of \$50 to each winner would accompany the trophies.

During the mid-day adjournment a banquet was tendered the visitors in the Palliser, the guest speaker being Major Strange, former wheat champion of Fenn, Alberta, who urged the publishers to use their influence in pointing out the desirability of western Canadian grain growers maintaining that high standard of wheat which in former years had occupied a pre-eminent place in world competitions. There had been a tendency through the depression to let down on that standard, while other countries such as Argentina and Russia had been improving the grain standard. By encouraging the grain growers to regain their confidence in Alberta's climate and their own

ability to produce a very high quality of wheat, they would be forming a useful service.

At Saturday's noon luncheon, tendered by the Calgary Herald, the guest speaker was Mr. E. L. Gray, manager of the Eastern Irrigation District, with headquarters at Brooks. He pointed out the necessity of water conservation, and pointed out the danger which in the past few years has increased through diminishing flows in Red Deer and Bow Rivers. The latter river supplies the district of which he is manager, and he stated that during this summer there was the extraordinary spectacle of a house being moved across the river bed, so low was the water.

He pointed out how necessary it was to restore the faith of people in Alberta. As an instance he told of a farmer in his district who this year would possibly have grossed an income of from \$20,000 to \$25,000. He told the speaker he was "sitting on top of the world," but was undecided if he would pay up his debts on his land in full, or withhold it from putting it back into his land. It was not for political reasons the farmer meditated this course, but he began to waver in his confidence because of experiences of most farmers and others since 1929 or 1930. He had farmed there for possibly 20 or 25 years, producing a high type of products, and this was only one instance of the danger of men valuable to the agricultural life of the province withdrawing their capital because they were afraid to put back into their property part of the capital they had earned from it.

He urged newspapermen not to try and tell farmers how they should do things. The farmers as a class resented being told, though responsive to capable leadership, and if their vision was renewed in their own province, they would thereby be encouraged to renew their efforts to overcome the difficulties which are being encountered, for Alberta still has the same high productive capacity as in its earlier years.

The luncheon was presided over by Mr. O. L. Spencer, vice-president of the Calgary Herald, and Col. J. H. Woods spoke briefly in reminiscent vein of his experiences with early weekly newspapermen, much to the amusement of the gathering. Orchestral selections were played at intervals, adding to the gaiety of the occasion.

Barber-Ellis Limited and Midwest Paper Sales Limited were the hosts at a banquet on Friday evening in the Palliser, and the newspapermen were welcomed by Mr. J. Stott, manager of Barber-Ellis, and Mr. G. A. Napper, manager of Midwest. They introduced to the gathering the

Premier Given Rousing Welcome

Was Interested in Extent of Coal Industry—Unemployed Delegation From Hillcrest Desired Information.

Premier Aberhart was accorded a rousing welcome last Thursday by Social Credit supporters from Pass towns, and people from the country districts in the foothills and some from British Columbia. Arriving about 2.30 p.m., he was taken to the White Lunch.

A drive around the mining properties under the guidance of Mr. George Kellock, vice-president and general manager of the companies, revealed to the premier the extent of the bituminous coal industry in this district, who freely commented on the possibilities of further extensive development by utilizing coal for power production.

A delegation of unemployed waited on the premier at the White Lunch, asking for information as to what his government intended to do to meet their needs. No official information was obtained as for their conversations with the premier.

The evening mass meeting in the arena vociferously welcomed the premier, who was accompanied by E. O. Duke, M.L.A., J. Hartley, M.L.A. of Macleod, and Rev. Roy C. Taylor M.L.A. for Pincher Creek. Principal McLean of Bellevue was chairman. The band under Fred Beddington, leader, played selections, and the opening hymn, "O Canada," and the national anthem to close the meeting.

Premier Aberhart spoke along lines similar to other addresses given in the southern part of the province, which were fully reported in the daily newspapers. Following the meeting he was driven to Macleod, and on Friday morning he went to Calgary, registering at the Palliser hotel at noon and resting there till Saturday afternoon, when he went to Edmonton to spend Sunday.

Following the public meeting, a supper was served in the Oddfellows hall, where the executives of the Pass Social Credit groups heard the premier in a brief address. A number of townspeople were invited.

His southern tour it is reported was quite a strain on him, but after resting over the weekend, he resumed his series of meetings commencing with Drumheller on Monday evening, where about 3,000 people heard him.

School Name Contest

Several entries have been received this week, and pupils are reminded that there is a \$5.00 prize for the name selected for the new school. Added interest would be given if the pupils submitting names gave a brief description of the reason they selected the name.

The attention of readers is directed to the second of a series of life insurance advertisements on Page 5. It is of interest to all.

High School Rugby Team in Action

High school rugby has made its debut in the Pass during the past few weeks with teams from Coleman and Blairmore high schools. They have met twice, Blairmore having the edge, tying the first game 5-5 and taking the second 5-0.

What the boys lack in equipment they make up in enthusiasm and enter into the fray with utter abandon. The locals started playing the game last year under the coaching of Jerry Richards, former Regina player, a salesman in town at that time. This year they are under the guidance of Kelly Shannon, a graduate of Saskatchewan University, and 14 players practice faithfully on the football field every night.

The next game between the locals and Blairmore will be played at Blairmore next Wednesday at 5 p.m., when Coleman expects to even matters, states Bob. Emmerson, captain. The stars of the Pass teams will likely play against Lethbridge Collegiate in the near future.

Legion Club is Live Issue

Canvassing Committee Have Over 100 Ex-Service Men's Names on List—Fund Now Over \$1,000

With an objective of at least \$15,000, the building and canvassing committee of the Canadian Legion will continue their campaign to sell \$25 bonds, payable at \$2.50 per month by ex-service men who will co-operate in the erection of a club for recreational purposes.

The first to sign a bond was Mayor Pattinson, who is in thorough accord with the proposal, and who will become a honorary member of the Legion. Several members of the canvassing committee reported sales, bringing the fund up to \$1,080, including the proceeds of the carnival held in May.

In connection with general affairs of the Legion, arrangements are proceeding for Remembrance Day service, and the annual sale of Vetcraft poppies. The regular meeting of the Legion and the Auxiliary will be held on Friday evening.

Year-Round Fire Prevention

Fire prevention week has come and gone, but fire hazards are still extant. If, however, the lessons learned during the recent fire prevention week's campaign are taken to heart and borne in mind, the risks of loss of life and property from this source should be minimized, in any event for a short time until memory wavers.

In a country like Western Canada, however, fire prevention week should be given every week the year round, so far as the individual is concerned, and certainly from October 1, when hard stoking commences, until about April 7 when furnaces and stoves are extinguished for a short, summer season.

As indicated at the outset, memory soon lapses, and while impressions of the importance of care and precaution in the handling of fire may be vivid during the course of a public campaign, such as accompanies an event like fire prevention week, they soon fade. Such campaigns serve a useful purpose temporarily, but whether they are effective permanently depends upon the receptiveness and retentiveness of the individual mind.

Moreover, with fire, as with everything else, familiarity breeds contempt. The continuous use of fire in the home or store, day in and day out for 24 hours of the day is apt to result in relaxation of precautionary measures against potential contingencies. This, coupled with increasing impairment and declining efficiency of equipment as the long winter months drag towards a close, combines to enhance the hazards of loss from conflagration.

These observations are inspired by the facts which statistics of Dominion and provincial authorities and fire insurance companies and newspaper stories record.

Despite the annual campaign which is carried on with much vigor and great publicity by these combined forces in an effort to instill precaution in the public mind, the fire demon continues to take a terrible toll of life and property in this Dominion.

When it is reported that on the average, every day in the year one life is sacrificed and more than one person injured by fire and \$110,000 worth of property goes up in smoke in Canada, the phrase "terrible toll" assumes definite significance and gives graphic portrayal to the adage which says that "fire is a good servant but a bad master."

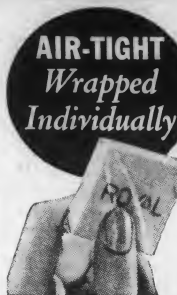

A daily loss of property of \$110,000 is equivalent to approximately \$40,000,000 a year. The enormity of this sacrifice to the fire god can be better appreciated when it is pointed out that the figures in a close parallel to the Dominion government's contribution under relief legislation in each of the years 1931 and 1934, the two years in which federal expenditures for this purpose reached a peak since the depression started. In 1931 the federal government's relief bill amounted to \$42,716,715 and in 1934 it was \$36,930,144, according to the Dominion Bureau of Statistics.

In other words, the people of Canada, on the one hand, are destroying annually \$40,000,000 of property as a result of their carelessness in handling fire and on the other hand, are, in heaviest unemployment years, paying out approximately the same amount for relief of unemployment, through federal taxation channels.

Much concern has been shown and is being shown over the large sums which the federal government has had to pay out in its efforts to grapple with the loss occasioned by unemployment and industrial and agricultural depression. Figures of expenditures for this purpose and articles dealing with various phases of the cost of unemployment and depression have been published almost daily during the past few years, yet but little is heard of the equally heavy loss occasioned by fire, except once a year when the annual fire prevention campaign is in progress.

And yet this heavy fire loss is more easy to cope with than the unemployment and relief problem. All that is required is the exercise of the same care the year round as that which people display in the handling of fire during fire prevention week when the subject is fresh in their minds.

It is not necessary to recapitulate here and now the lessons which have been taught during fire prevention week, the precautions which must be taken to ensure that loved ones will not be burned to death or maimed for life and to prevent the destruction of homes, barns or other buildings and furniture. If only people will train themselves to remember and practice these precautions and to maintain vigilance the year round, this tremendous toll of life and property can be reduced almost to zero.

ROYAL YEAST CAKES always keep FULL STRENGTH

Use Tested Royal Sponge Recipes and Royal Yeast Cakes for these fine breads

An air-tight wrapping preserves the freshness of each Royal Yeast Cake—the only dry yeast with this extra protection. You can count on their full-strength leavening power whenever you use them. 7 out of every 8 Canadian women who prefer dry yeast demand Royal. Buy a package today.

World-Hiker Paralyzed

Son Of Famous Explorer May Never Walk Again

John Carveth Wells, son of the famous explorer and who walked around the world in two years, may never walk again. At 25 he lies paralyzed in St. Francis Hospital in London. After a gay and colorful life John Wells started a motion picture publication in London. He planned it, collected the news and the advertisements, and printed it himself. For months he worked from 9 a.m. to 4 p.m. One day he collapsed in his office. Within 36 hours he could not move any part of his body. He has recovered the use of his hands and his head. Courage and determination have brought him through, and he declares he will not give up the fight to walk again.

Would Reduce Accidents
More than 7,000 lives could be saved yearly through adequate illumination of major traffic arteries between cities, Paul H. Goodell, chairman of the street lighting committee, reported to the 50th annual meeting in Toronto of the American Society of Municipal Engineers and the International Association of Public Works Officials.

Ideals Of The League

Hon. R. B. Bennett Voices Appeal On Behalf Of League Support

Hon. R. B. Bennett, Canadian Conservative leader, told an Australian service club that the British Dominions must support any agency whereby the collective power of mankind prevailed against those threatening annihilation of the civilized world.

Mr. Bennett voiced a fervent appeal on behalf of the ideals of the League of Nations. "Because there has been a failure to realize the fullest hopes for the League, we cannot discard it in its entirety," Mr. Bennett said. "I refuse to believe Napoleon's maxim that God is on the side of the heaviest battalions."

The former Canadian prime minister said that while human nature had defeated the hopes for the League as enunciated by Aristide Briand, the ideal remained. "Although the League lamentably failed to express punitive power against an offending nation, the world must try again." He said that the British Dominions must support the League to this end.

Mr. Bennett asked Australians not to consider Canada as an appendage of the United States. The choice of our nation laid down their lives on the fields of Flanders in British loyalty and Canada has no idea that any other nation exercised suzerainty or provides its protection. We are proud of our place in the Empire and conscious of our responsibility as being midway between Europe and Asia.

Food Faddists

Freak Diets Termed A Starvation Course By American Doctor

The "freak diets" of the food faddists were termed a starvation course to "physical destruction" by Dr. Milton Bridges, diet expert of Columbia University.

"There does not exist any fruit, meat or other food which in itself is capable of reducing physical weight as much as 1-1000th of a pound," he said in an address.

If there is one general deficiency in the North American diet today, he added, it is lack of protein. Mide-aged persons in particular are inclined to be anemic because they fail to eat enough meat, eggs, cheese, fish and gelatin.

"It is about time some of our old ideas were exploded," he said.

"The efficacy of fish as a brain food, lettuce to produce sleep, onions to cure a cold, parsley to increase fluid output, broth for strength, port wine and rusty nails for blood building, celery to soothe the nerves, skin milk and bananas for reducing, and last but not least, an apple a day keep the doctor away, have all been proved without foundation."

Flight Of Birds

Have Been Trans-Atlantic Flyers For Countless Centuries

When a man climbs into an aeroplane and hovers across the ocean and into the headlines is doing something that is countless centuries old.

"Birds have been doing this for ages," said Dr. Frederick C. Lincoln, of the biological survey at Washington. He added that he was not belittling the accomplishments of human flyers.

But while man is aided by powerful machinery, compass and charts, Lincoln said the birds depended on instinct and abilities that have puzzled scientists for thousands of years.

The champion distance traveller known to ornithologists is the Arctic tern which nests in the cold regions near the North Pole, then flies across the Atlantic to Europe, and on down to the Antarctic beyond South Africa—an 11,000-mile trip—twice a year.

The golden plover, a bird about the size of the robin, is known to fly non-stop the 2,000 miles between Nova Scotia and South America over a landless route.

New Smuggling Racket

Peacock Feathers Are Being Taken Into China From India

And now they're smuggling peacock feathers. Peacock plumage is highly prized in China, but in India peacocks are regarded as holy birds. The Indian customs act forbids the export of the feathers of these "Children of the Gods."

Because of the good market in China for the feathers, many persons now are engaged in smuggling them there.

They had been married just about two months. Lunch was in progress. "Dinner!" he said suddenly. "This steak tastes funny."

"Oh, yes, dear," she replied, "I forgot to tell you. I burnt it, so I put some vasoline on it."

First Call for Ogden's!

You'll travel a long way before you'll find as smooth a fine cut as Ogden's. That's why this grand cigarette tobacco serves pleasure, and nothing else but. When you roll a cigarette with Ogden's and touch a light to it you're off on a non-stop run to full smoking enjoyment.

First call for Ogden's—then choose "Chanticleer" or "Vogue" cigarette papers. That's the complete menu for satisfaction in "rolling-your-own." And—the Cellophane-wrapped Ogden's package has the purple easy-opening ribbon for quick opening.

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug.

Gold Production Gains

Production In Canada During 1935 Greatest In History

Gold production in Canada during July, 1935, advanced to 319,505 ounces compared with 316,670 ounces in June and 285,763 ounces in July a year ago. Production during the first seven months of 1935 totalled 2,087,014 ounces, an increase of 15.6 per cent. over the corresponding period of 1934. The price of gold during July averaged \$34.91 per ounce, in Canadian funds, and valued at this price the Canadian output during the month was worth \$11,153,920.

Gold production in Canada during 1935 was the greatest in her history, both in amount and value. The output every month so far this year has been greater than in the corresponding month a year ago, and all indications point to a new high production record for 1935.

SELECTED RECIPES

DUTCH APPLE PIE

5 or 6 tart apples
1 cup brown sugar
1 cup cream

Putty Flour pastry

1/2 teaspoon cinnamon or nutmeg.

Method: 1. Pare apples, core, cut into eighths and arrange evenly in deep pie plate lined with pastry. 2.

Pour cream over apples and sprinkle sugar and spice on top. 3. Bake in moderate oven 350 degrees for 30 minutes, or until apples are tender.

Made From Shell Cases

A violin made from empty shell cases of the famous French "75's" during the World War, which is played nightly in a London West End restaurant, is believed to be the only brass fiddle in the world. M. Tapponiere, the owner of the instrument, said the violin was made behind the French lines at More de la Faux in 1917 to cheer up officers at mess.

Resemble Real Thing

Visitors delirious when approaching the farm house of Fred Wagner, near Spring Coulee, Alberta. A large patch of cucumbers in his garden resembled masks until closely inspected. One measured 60 inches in length and was called to present a perfect likeness.

Increase German Army

Conscription To Raise Fighting Force To 800,000 Men

A widespread increase was ordered in the German military establishment as Nazi officials began conscription to raise their fighting forces to 800,000 men under the new two-year compulsory service law.

Hitler, taking a leaf from the Kaiser Wilhelm system, decreed the two-year service Aug. 24 to become effective Oct. 1. The training period previously was one year.

The recruits are 21 and 22 years of age—Germany's war babies—parts of the classes of 1914 and 1915. They will be distributed among the land, air and sea forces and represent an increase of from one-fourth to one-third in the nation's armed strength.

Just The Thing

Her newly elevated ladyship had just been introduced to a notable elocutionist, who had kindly volunteered to entertain the children at a local charity garden fete.

"It is nice of you to say you will entertain the children, Mr. Duntong-Greene. How shall I introduce you?"

"Well, your ladyship, I usually recite extempore."

"Oh, 'Extempore!'" she gushed, "I know of no piece more appropriate!"

There are only two classes, those who wish they had enough to eat and those who wish they hadn't eaten so much.

BROKEN REST

Getting up night after night, breaking your rest, will damage your health. Burning, scalding, suppressed or too frequent passage warns of kidney and bladder trouble. It is dangerous to let these conditions go unchecked. Soothe and strengthen your kidneys and bladder with time-proved—

Soviet Russia May Continue To Adhere To Pact

London.—Soviet Russia, threatening to withdraw from the Spanish non-intervention agreement, was understood to have decided to continue co-operating for the present.

This decision, reported by a high diplomatic authority, came after a day of stormy charges and counter-charges and the dramatic walk-out of the Portuguese delegates from the non-intervention committee meeting.

Portugal, with Germany and Italy, had been accused by Russia of aiding the Spanish insurgents in their struggle against the Madrid regime.

A surprise was created in committee circles when Charles de Gaulle, Exchequer Neville Chamberlain, acting premier during the absence of Prime Minister Baldwin, was quoted as having said Britain would leave the non-intervention committee if Russia could prove her charges.

The Press association, which said Clement Attlee, Labor leader in the House of Commons, quoted Chamberlain to that effect in an address at Kilmarnock, later stated, however, Attlee's statement had been misinterpreted.

The news agency said Attlee's declaration actually was that an inquiry into the facts in the case should be conducted with the greatest possible speed and that the British government had given him assurance this would be done.

The Labor leader in the Press association said: continued:

"The Labor party has said that it as a matter of fact this agreement (the non-intervention pact) is not being carried out, then the constitutional government of Spain must have restored to it its right to get the arms it needs."

A communique issued by the non-intervention committee said:

"The Italian representative, after having energetically refuted and repudiated every single point of the allegations directed against Italy, declared all these allegations were entirely fantastic and devoid of any foundation whatsoever, and this would easily be proved by answer which would be given in due time by the Italian government."

Canada's Gold Output

Value Of Production For This Year May Exceed \$135,000,000

Ottawa.—Gold production in Canada will likely exceed \$135,000,000 in 1936, said a statement issued on behalf of Hon. T. A. Crerar, minister of mines and resources.

Made public following an official report that a new high monthly record of 328,697 ounces had been set for production in August, the statement said:

"There is every confidence that the value of gold output in 1936 will reach \$130,000,000 as predicted early in the year, with the likelihood that the amount will exceed \$135,000,000. For 13 successive years then the industry will have established a new record in the annual value of its output."

To Represent Canada

Geneva.—Prime Minister Mackenzie King, with Senator Dandurand and O. D. Skelton, under-secretary of state for external affairs as substitutes, was named to represent Canada on the new League of Nations assembly committee studying amendments to the league covenant.

For Better Understanding

Rome.—First soundings for an understanding between Great Britain and Italy in the Mediterranean have been made in diplomatic channels, well-informed persons have stated.

Air Bases May Be Established On The British Columbia Coast

Victoria.—"Substantial developments" in all three branches of the service, army, navy and air force, were forecast by Defence Minister Ian Mackenzie in an interview.

Many of the details of contemplated projects had to be worked out by experts but he said that under a tentative scheme a series of air bases might be established along the British Columbia coast. One would be at the south end of Vancouver Island, probably at Esquimalt;

Adult Education

Western Educationist Sees Value In Debating Clubs

Halifax.—Aims and advantages of adult education were reviewed here by E. A. Corbett, former extension director of Alberta University and now director of the Canadian Association for Adult Education, at a joint meeting of Halifax service clubs.

"There is no better way of getting young people off the street corners than by holding debates," the western educationist said. There were more than 160 debating clubs in the province of Alberta.

Adult education provided means by which people might bring out talents in later life; helped those with little or no education; helped workers to adjust themselves to swiftly-changing industrial life and to acquire a sound philosophy of life.

Education of mature people was on the theory that "man has not one mental life, but a series of mental rebirths throughout life, and that during each decade of his life, new powers and new possibilities come to maturity."

Monument To Currie

To Honor Memory Of Commanding Officer Of Canadian Corps

Montreal.—A monument to the late General Sir Arthur Currie, commanding officer of the Canadian Corps in the Great War from 1917 to 1919, is to be unveiled in Mount Royal cemetery here Armistice Day, November 11. Construction of the granite memorial is being directed by a committee of former members of the Canadian Corps.

In the foundation of the monument which will embody "The Cross of Sacrifice" earth from Vimy Ridge, the Somme and the Ypres salient is to be deposited. The stone erection will bear the following inscription:

"Erected by former members of the Canadian Corps in memory of General Sir Arthur Currie, C.M.G., K.C.B., V.D., L.L.D., E.C.L., general officer commanding Canadian Corps in the field, 1917-1919. Principal and vice-chancellor, McGill University, 1920-1933. They served 'till death—why not we?'"

Happy With Soldiers

Lord Tweedsmuir At Home When In Company Of Military Men

Ottawa.—"All my life I have been happy in the company of soldiers," Lord Tweedsmuir said in a brief address to the officers of the Princess Louise Dragoon Guards at the cavalry regiment's 63rd annual dinner.

The governor-general said that during his recent trans-Canada trip he had met men wearing medals for almost every episode of British army history in the last half-century. One man he met in British Columbia, he said, was wearing an Indian Mutiny medal. The sight of a veteran, he added, is a reminder of the extraordinary part played in war by the Canadian army.

Has Faith In West

Montreal.—Western Canada's progress toward complete economic recovery was far from being retarded by the recent drought, J. M. Davidson, Winnipeg, secretary of the industrial development board of Manitoba, said in an interview here. The west, he predicted, was slated for a period of growth that will surpass anything it has experienced in the last 10 years.

another would be at the north end of the island, either on the west coast or at Alert Bay; there might possibly be one at Prince Rupert and in the Queen Charlotte Islands.

The existing Jericho Beach air station in Vancouver would complete the system. Extensions to the hangar space there would go ahead. Mr. Mackenzie said steps already had been taken to modernize Canada's air equipment with placement of an order from England of seven Blackburn shark planes.

New Cunard-White Star Liner

Sister Ship To Queen Mary Of Larger Dimensions

Glasgow.—The new Cunard-White Star liner to be built by John Brown and Company will likely be 2,000 tons heavier and from 12 to 18 feet longer than the R.M.S. Queen Mary, it was revealed.

William Beardmore and Company of Glasgow, announced it had received the contract to supply hull castings for the new liner, which to date is known only as No. 552.

"The 552 is expected to have rather larger dimensions than the Queen Mary," the company said. "Its tonnage is likely to exceed the 80,773 of the Queen Mary by about 2,000 tons and to be from 12 to 18 feet longer. Thousands of workers throughout the country, as well as at Clydebank, will benefit by the liner's construction. In the case of the Queen Mary, 200 firms in 60 towns supplied accessories for the ship."

The new liner will be laid down on the same ways as those used for the Queen Mary. A contract between the Cunard-White Star Line and John Brown and Company was signed recently.

Madrid Hemmed In

Fascist Leaders Promise To Blow City To Pieces Unless It Surrenders

Burgos, Spain.—Fascist leaders promised "to blow Madrid to pieces" unless it surrenders to the advancing insurgent forces.

"We recommend that the civil population does everything in its power to make the government surrender," read circulars showered on Madrid from Fascist war planes.

"The greater the resistance the greater will be the attack," they read. "Madrid will be bombarded incessantly from both land and air."

Fascist lines hemmed in Madrid on three sides with only the eastern sector open.

Steadily the southern and bottom side of the advance was stretched longer past Madrid. The strategy then was to march troops on this line due north, completely boxing the capital.

The insurgent juggernaut under General Francisco Franco rolled swiftly, howling over town after town in its path, finally halting before San Martin De Valdeiglesias, whose fall the insurgent leaders expected momentarily.

State Socialism

Says Substantial Part Of Canada Is Subject To Regimentation

Ottawa, Ont.—William H. Moore, Liberal member of parliament for Ontario riding, told a service club meeting that government ownership "is only state socialism."

"We have an example in our railways, which own hotels, laundries and barber shops," said Mr. Moore, discussing government ownership. "Our central bank marks the coming of the economic state," he continued. "Do you realize that we are in a state socialism today? The relief situation is an aspect, when one-third of our income is distributed to keep alive others."

"A very substantial part of our country is subjected to regimentation. Names sometimes deceive us. Mr. Trotsky and Lenin once called themselves Socialists," he concluded.

Order For Airplanes

Ottawa.—W. J. Sanderson, president of the Fleet Aircraft Corporation of Canada, said his company had received an order for 10 training aircraft from the department of national defence. He did not name the price which was understood to be about \$75,000. The Fleet factory is at Fort Erie, Ont.

LEGION HEAD ILL

Brig.-General Alex. Ross, Dominion President of the Canadian Legion, who has been ordered to rest for three months and has resigned from the War Veterans' Assistance Commission.

Relief Grants

Grants To The Provinces To Remain The Same

Ottawa.—Relief grants-in-aid to the provinces for the third quarter of the current fiscal year will be continued without change, Acting Prime Minister Ernest Lapointe announced. These payments, under the Relief Act for 1936, are subject to revision every three months but have been left unchanged since the start of the fiscal year April 1.

Other matters dealt with at the weekly cabinet council included work contracts and the trade agreement under discussion between a trade mission from Germany and the Dominion government. Mr. Lapointe said progress was made in negotiations with the representatives of the Nazi government, but much remained to be done before an agreement could be announced.

Relief grants-in-aid, initiated by the Bennett administration, involves the outright payment of fixed monthly sums to the provinces for direct relief, with the provincial governments making up any deficiency. During the last session of parliament an appropriation of \$25,000,000 was passed for this purpose.

Payments have been made since April 1 at the rate of \$2,345,687 monthly. Under the last administration the highest monthly rate reached was \$1,757,250 and soon after the present government took office a general increase in these payments brought the monthly total to \$2,066,218.

Swedish Flyer Rescued

Forced Down Off Irish Coast After Atlantic Hop

Valentia, Ireland.—Forced down in the Atlantic on an attempted flight from New York to Stockholm, Kurt Bjorkvall was rescued by the French, trawler Imbrin off the westernmost point of Ireland.

First word from the long overdue Swedish airman, who had not been reported since he took off from Floyd Bennett field, came in a wireless message from the trawler.

"Bjorkvall sauve (saved)" it said. Valentia is an island on the western coast of southern Ireland.

Bjorkvall's flight ended, it was estimated, about 2,375 miles from New York and approximately 1,000 miles short of Stockholm, is goal.

FIRST LORD OF THE ADMIRALTY

Sir Samuel Hoare, coming ashore at Portsmouth after inspecting the Mediterranean fleet—an inspection to which the Italian press ascribed very ulterior motives.

Warning To Japan Seen In Statement Of U.S. Naval Secretary

State Health Insurance

Legislation For This Purpose Is Inevitable, Says Ontario Minister

Toronto.—State health insurance in Ontario is "inevitable," Hon. David A. Croil, Ontario welfare-labor minister told a druggists' meeting, adding that when the legislation was ultimately passed the insurance plan would be built upon the framework already provided for the province's medical-relief system.

"It's inevitable," he said. "It's as certain as I'm standing here that within our time a system of state health insurance will be introduced in Ontario."

As the medical-relief system stood at present, Mr. Croil said, only two classes of society could count on really adequate medical attention—the well-to-do, with the money to pay for it, and the unemployed, who receive it free.

"What about the man in between, the low-wage earner?" he asked. "He's too proud to ask, too poor to pay. To him any illness is a difficulty and a serious illness is a catastrophe. He's the one—the man earning up to \$2,000 a year—who would be helped by state health insurance."

Inspector Of Aviation

Dr. Robertson And Five Assistants Appointed By Ottawa

Ottawa.—The civil service commission announced the appointment of Dr. W. J. R. Robertson of Merrickville, Ont., as inspector of civil aviation with headquarters at Ottawa. At the same time the appointment of five assistant inspectors of aviation was announced.

Dr. Robertson and the five assistant inspectors will be attached to the civil aviation branch which is to become part of the new department of transport, after its appointment to report for duty in the districts specified by the department. Dr. Robertson is at present at Sioux Lookout, Ont.

The assistant inspectors are: J. L. Blouin, Quebec, for duty at St. Hubert airport; Eric E. Billington, Sault Ste. Marie, for duty in the Edmonton district; William S. Lawson, Vancouver, for duty in the Lethbridge district; Samuel Foley, Hamilton, and John R. K. Main, Toronto, are to report at headquarters civil aviation branch, Ottawa.

Cosmopolitan Clubs

Edmonton Convention Elects Officers For Western Federation

Edmonton.—Western Federation of Cosmopolitan Clubs re-elected Lovell Smith, of Saskatoon, as its district governor at its one-day convention.

Other officers named were: Lieutenant-governor, A. C. McArthur, Calgary; secretary, Arthur Parkin, Saskatoon; treasurer, Herman Stevens, Calgary; board of managers, Clair Malcolm, Calgary; W. S. Briggman, Saskatoon; Dr. R. P. Mulholland, Vancouver; Charles L. Gillis, Winnipeg; Herbert Hancock, Edmonton; F. Kenny, Calgary.

Mayor Joseph A. Clark, of Edmonton, was speaker at a dinner held by the federation.

Washington.—Notice was served by Secretary Swanson the United States navy should be prepared to meet "menace with menace" in any attempt to increase fortifications in the Pacific after the expiration this year of the Washington naval treaty.

In a declaration interpreted by many observers as an indirect warning to Japan not to disturb the Pacific "status quo," the naval secretary told reporters:

"Fortifications are intended to answer fortifications. One menace must be met by another menace."

His statement was made while the United States state department studied a communication from the British government proposing an extension of the treaty pledge of Great Britain, the United States and Japan not to build new fortifications or naval bases in certain of their Pacific possessions. The main proposal was sent by the British foreign office to Japan.

State department officials declined to discuss the probable contents of the United States answer to Britain. Secretary Swanson's declaration was generally accepted, however, as the navy's attitude that if Japan inaugurates a program of fortification of the north Pacific islands under her control, the United States must do likewise.

Alberta University Head

W. A. R. Kerr Is Appointed As President To Succeed Dr. Wallace

Edmonton.—Appointment of W. A. R. Kerr as president of the University of Alberta to succeed Dr. R. C. Wallace was announced here under authority of Premier Aberhart. Mr. Kerr, dean of the faculty of arts and sciences at the university since 1914, will be the third president.

Dr. Wallace, who resigned this year to become principal of Queen's University in Kingston, had been president since 1928.

The premier stated the government had felt, as soon as it became known Dr. Wallace was to retire, that a comprehensive survey of the Canadian field of available men should be made before a decision was reached.

"A very complete list was compiled, including several names from the local institution, and full information gathered concerning each," the statement said. After reaching a tentative conclusion he had consulted the board of governors, the deans, and several of the senior professors, only to learn that the opinion of all coincided with that of the government. "President Kerr then takes up his new responsibilities with the satisfaction of knowing he was the unanimous choice of the government, the board of governors and a large and representative group of the faculty."

Awarded Victor's Trophy

Johannesburg, S.A.—Charles W. A. Kerr, co-winning with Glen Guthrie of the Portsmouth-Johannesburg air race, was awarded the victor's trophy at a dinner in his honor. Cheques totaling \$5,000 have been mailed by I. W. Schlesinger, sponsor of the race, to the families of Max Findlay and H. A. Morgan, pilot and radio operator, killed when their plane crashed near Lake Tanganyika.

British Troops Engage Large Force Of Arabs In A Serious Clash

Haifa, Palestine.—Fighting took place on the slopes of historic Mount Carmel, as 1,500 British troops engaged a large force of Arabs in what appeared to be the most serious clash so far in the Palestine disorders.

Three Royal Air Force planes aided the troops in the fighting, which was still going on as night fell. Mortars were being used to shell the Arabs out of their positions of the rocky mountainside.

North Lancashire infantry advanced steadily as the Arabs retreated from rock to rock.

Rifle fire and the booming of the mortars could be clearly heard in Haifa, which lies at the foot of the mountain where according to the Scriptures Elijah destroyed the prophets of Baal.

The slopes of Mount Carmel are covered with pine, olive and laurel groves and are dotted with rocky caverns, providing a highly advantageous defence terrain.

Jerusalem.—At least 18 men were killed or wounded in the fighting between Arabs and British troops on Mount Carmel, preliminary reports said.

The official report said none of the British soldiers or airmen had been wounded.

The list of Arab casualties mounted to 18 when another armed Arab band made a raid on the police station at Beit Dajja, Arab town near Jaffa. The police wounded two. Imposing swift punishment for several cases of sniping at troops, a military detachment surrounded an Arab village between Acre and Safed and demolished two houses.

NOTES AND COMMENTS

THE Building of the new school creates additional activity and increases employment. It is an indication of progress, and the first large building of a substantial nature to be erected for a number of years, outside of buildings erected by the coal companies. The next good building will be the club for the Canadian Legion, as considerable enthusiasm is being shown towards the proposal.

THE PREMIER has made his triumphal march through the south. He really told us nothing that was not already known, as it is difficult for any speaker to hold a series of meetings without repeating what he has told other audiences. Natural curiosity impels people to come and see and hear Mr. Aberhart, who has a knack of stirring up enthusiasm by words alone, an art developed through his years of broadcasting through Calgary Prophetic Institute.

WITHOUT question credit has been seriously impaired, and there is a lack of confidence as a result of debt legislation. Many fail to understand how dividends can be created without taxation or confiscation, and repeated assurance of the premier notwithstanding, those owning real instead of imaginary assets are quickly taking steps to safeguard their capital. Capital is very cautious. The man with only \$1,000 is likely to be just as careful as those with much larger amounts.

A CHALLENGE has been sent to the premier to either make charges against newspapers that misrepresent him, or state to which articles and which papers he refers. In his Saturday radio address (by electrical transcription) he said "we were attacked by practically every Canadian newspaper with scandal, vilification and libel and that was the reason why the government decided at least one newspaper was necessary which would keep the records straight."

THE PREMIER possesses an amazing inconsistency. Long before he began his campaign of belittling the influence of all newspapers, he had in view the purchase of the organ now partly owned by his party. His attitude is grossly misleading and might be classed as drawing a red herring across the trail, to divert people's attention from the real objective which he promised he would achieve. The selling of stock for the party paper has been disappointing, only about one seventh of the purchase price, it is reported, having been raised. So unfair has been his attitude that the weekly publishers of Alberta sent him a strongly worded protest putting the issue squarely up to him to name the papers which he accuses of misrepresentation. He has the means to immediately take action but he prefers to accuse all in a mass of generalities which mean little or nothing except to denounce all newspapers for purely political reasons. These mock trials and rhetorical fireworks displays via the radio are done for effect. They lack sincerity, and suit Mr. Aberhart's purpose far better than bringing definite charges or taking legal measures to effect a remedy, except threats to muzzle the opposition press.

NEWSPAPERS are the voice of the people. The people's freedom is menaced when the freedom of the press is shackled. No newspaper yet has turned down a "Letter to the Editor," provided it is not of abusive or libellous character. The very people whom Mr. Aberhart so grandiloquently asks if he shall license the Press or listen to the bondholders do not realize the danger they are placing themselves in of being hog tied by covenants and the evils of ill-considered legislation which already has caused the province harm from which it will take years to recover.

OCTOBER weather of the very finest prevails as this is written. Clear air and sparkling sunshine impress on us the fact that no matter what economic clouds may hover over Alberta, the sunshine for which it is famous sheds its benign influence, and bids us to maintain that optimism and courageous vision characteristic of the pioneers who laid the foundations of the western provinces and made good irrespective of government aid. They did not waste time pondering over schemes of getting something for nothing. They just went ahead and worked, and that is what all have to do if they wish to be happy.

"PRINTERS are often accused by their customers of taking too great pains. Their only reply is, and should be, that they are craftsmen and so cannot help doing their best."

"NO MAN can escape work; but every man, by evoking enthusiasm, can save himself from the wearing friction of drudgery which makes earning tedious, advance improbable, and breakdown almost inevitable."

Death of Joe Rayman

The funeral service for Joseph Frank Rayman was held this afternoon from Holy Ghost church at which many friends were present. Deceased who was 54 years of age, had lived here for 23 years, and members of the family living besides his wife are Frank, George, Eddie and Charles, and a daughter, Mrs. J. Reynard, jr., of Kenora, Ont., who came here for the funeral. A son, Joe, was killed 6 years ago at McGillivray tipple. He was employed at McGillivray mine, and originally came from Germany, though he was a native of Czech-Slovakia. General sympathy is extended the family in their bereavement.

Retailers Form Credit Bureau

Accounts Must Be Paid Every Two Weeks—Trade Customs Demand Prompt Settlements

At a meeting of retailers in groceries and meats, to discuss measures to be taken to ensure prompt payment of accounts and to try and place their business on a cash basis, it was decided that a credit bureau be formed, the members to meet monthly to receive a report from the secretary.

Merchants having to meet wholesale accounts every fifteen days, customers in turn must meet their accounts every pay day. It is just a matter of making it a habit to meet the bills instead of allowing accounts to accumulate.

Cards are displayed in every store with the following thereon: "As a member of the Retail Merchants Association, it is our duty to notify the Association Bureau of all overdue accounts. In future all accounts must be paid in full every two weeks."

Credit will automatically cease for all those who do not pay their accounts in full.

Mr. and Mrs. Norman Smith of Lethbridge visited Mr. and Mrs. Jack Derbyshire over the week-end.

A committee of the Legion will be appointed to arrange a Remembrance Day service in the Community hall.

Fell By The Way

Frank Krish, returning from work on Wednesday, found an exhausted duck, or to be accurate, a "hell diver," on the tennis courts. He picked it up and took it home, to give it a rest, after which he said he would release it. Apparently it had dropped out of a flight of birds. It seemed quite content as it nestled in Frank's arms.

Working With A Will

Boys, young and old, of Central school, were belaboring with picks and shovels on Wednesday afternoon after school hours, digging up rocks and smoothing the surface for the site of their track to be made on the north side of school. John McDonald and Ray Spillers were the gang bosses, and the gang worked like a cyclone for about half an hour.

Home League sale Friday, Oct. 23, at 3 p.m.

Mr. George Cruickshank of Hillcrest has been confined to his home for some weeks, through illness.

Policyholders Own the "Assets" of Life Insurance Companies

AS a great co-operative enterprise, Life Insurance has built up Assets in Canada totalling, approximately, two billion dollars. Yet these Assets are relatively small when it is realized that they are jointly owned by about 3,500,000 policyholders—one-third of Canada's population.

On the average, each policyholder owns \$571 as his share of the total Assets in Life Companies operating in Canada. Obviously, the great majority of policyholders are men and women of ordinary means—thrifty people who, year by year, have entrusted to Life Insurance part of their savings so that they may have financial security against the uncertain future.

These policyholders represent the best type of Canadian citizens. They have sought to preserve their financial independence, and,

as thrifty citizens, neither they nor their dependants are ever likely to become charges upon government or municipal relief.

To protect the interests of these 3,500,000 Canadian policyholders, Life Insurance Companies have invested their Assets in government and municipal bonds—in first mortgages—in public utilities and industrial enterprises—and in other authorized securities.

The soundness of the Investment policy of the Companies has been tried and proven during periods of severe financial stress. Governing and corporate bodies in which policyholders' moneys are invested have, until recently, maintained the integrity of their obligations. This has made it possible in turn for the companies, in their capacity as trustees for the policyholders, to fulfill every obligation guaranteed by their policies.

Now, however, there is a growing tendency to repudiate, by legislation, public and private debts, regardless of the debtor's ability to pay. Legislation which tends to destroy the ownership of public and private property places an unjust burden upon life insurance policyholders.

Formal request that a segment of the better broadcasting channels be set aside for exclusive use of educational institutions was laid before the United States communications commission as it opened a hearing on proposed revisions of radio regulations.

Another Life For Science

French Noblesman Continued X-Ray Studies To Aid Sick

To the list of those who have given their life for science is now added the name of the clever and charming Duchess de Brocas.

The career of this "Florence Nightingale of France" is one of the most amazing examples of a woman's heroism in medicine.

Beginning at an early age in one of the leading X-ray centres in Paris, she rapidly gained a reputation as a brilliant radiologist.

After her marriage to the Duc de Brocas she insisted on continuing the work of bringing relief to hundreds of patients. Nearly two years ago she was taken ill. The rays had burnt into her skin and affected the tissues.

Her fellow-radiologists begged her to give up the work, and to go into hospital for treatment. "I would rather go on," she said, in a letter. "We must all die sooner or later. I am a trained radiologist, and to give up my work would be to deprive a large number of people of vital aid."

The duchess invented a special type of electrically heated needle, regarded as a very important advance in X-ray treatment, and helped to perfect other X-ray instruments.

The effect of the rays on her health gradually increased. She lost one of the fingers on her right hand and her hand had to be amputated. Then her arm was poisoned and was also amputated. Still she kept on at her post.

Agricultural Revenue Up

The total gross agricultural revenue of British Columbia is estimated at \$42,419,892 for 1935, an increase of \$2,593,851, or 6.51 per cent, over 1934. Increases are shown in the revenue from farm animals, wool, dairy products, fruit and vegetables, poultry and eggs, fodder crops, hops, nursery stock, and fur-farming. Minor decreases are shown in the revenue from grains, potatoes, honey, tobacco, and seeds. Compared with the preceding year, slightly higher average prices were recorded in most branches of the agricultural industry.

Reformation Stamps

Two new stamps are now on sale at Copenhagen. They have been issued in connection with the 400th anniversary of the Reformation. Both stamps bear a portrait of Hans Tausen (1494-1561), the champion of Luther's doctrine in Denmark, based on a portrait in the Frederiksborg gallery.

Marble Arch, now opposite Edgeware Road, London, stood until 1851 at the central entrance of Buckingham Palace.

Declares Sea Maps Obsolete

U.S. Coastguard Commander Returns From Charting North Pacific

United States Coastguard Commander L. V. Kjelhorn returned to Seattle, Wash., from a charting survey of the far north to declare all "Bering sea maps obsolete."

The commander of the cutter Cheilan announced the discovery of a new North Pacific "deep" more than four miles south of the Aleutian Islands as his vessel returned from the annual summer work of redefining the Bering sea and sounding the ocean in charting surveys.

Commander Kjelhorn said the survey had proved there is no "gateway" south of the Bering sea to the North Pacific. Last summer the Cheilan discovered an immense under-sea mountain range in the Bering sea.

The new ocean deep, 4,199 fathoms, was found in the "Aleutian trough," south of those islands and near the regular north Pacific steamship route, he said.

Important To Europe

Italian Chemists Making High-Grade Wool From Milk

Italian cows, by personal order of Premier Mussolini, are now producing wool and the announcement by Italian chemists that they are making high-grade wool from cow's milk may bring chuckles to western American cattlemen, who never could see any justification for sheep anyhow, but conversion of the loving kine into mutton plants is no laughing matter for jittery Europe.

Wool is an important commodity to modern European nations—military uniforms are made from it—and it must be especially necessary in countries operating under dictators who require an abundant supply to be pulled over the eyes of their subjects. Rome, it will be recalled, was founded on a diet of wolf's milk.

The descendants of Romulus and Remus may yet march under triumphal arches, attired in uniforms of cow's milk.

Result Of Experiments

If Allowed To Stand Juices Lose Vitamin C

Orange juice contains from two to three times as much vitamin C as tomato juice. Either of the juices lose vitamin C if allowed to stand before using. These findings were the result of experiments conducted by the United States Department of Agriculture's home economics bureau. The tests included both chemical analysis and feeding trials of four varieties of oranges, two from California and two from Florida, fresh pressed tomatoes and juices from canned tomatoes. It was found that the canned tomatoes contained as much vitamin C as the fresh samples.

Could Not Accept Gift

Horse Offered To King Edward Had To Be Bought

The borough of Salford in Lancashire, England, offered the king as a gift a chestnut gelding called Cherry Grove, bought two years ago for the chief constable. Cherry Grove stands 16 hands high.

It is against etiquette for royalty to accept gifts which their own immediate circle. But the Duke of Beaufort, master of the horse, inspected Cherry Grove and bought him for £150 (\$750). Henceforth he becomes the king's charger.

Only One Way Out

Debts Can Be Cleared When Borrowing Is Stopped

There is no practical way out of debt except to repay it. A dollar borrowed is a dollar owed and a dollar on which interest must be paid. We are writhing now in the entangling meshes of the debt we have woven for ourselves. There is only one way to free ourselves: to stop public borrowing; to spend on government only those sums which can be obtained by reasonable taxation.

The new Waterloo Bridge, London, England, will be opened for traffic at the end of 1939.

These architects who try to make new houses look very old might try renting them for a year. 2172

Pioneer Nurse

Member Of Winnipeg General Hospital Staff Of Early Days, Is Dead

Nurse Emma Pulman, a member of the Winnipeg General Hospital staff in 1882 died recently. She was born in England in 1852. A graduate of Charing Cross Hospital, London, she volunteered for service when an appeal came for nurses to care for victims of "Red River Fever," then raging in the frontier settlement.

Nurse Pulman saw the medical profession make remarkable strides of progress during her many years of service. One of her most vivid memories was of the time she found a man semi-conscious on the outskirts of the north end of the city where the hospital was then situated. She brought the man to the hospital where medical examination revealed he was suffering from smallpox. Winnipeg's first isolation ward, a tent next to the hospital, was thus formed.

She had a passionate love for horses and dogs, in her youth having ridden with the hounds (still had her riding crop) and of late years bred colts.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The bile should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, food does not digest. It just decays in the bowels. Gas builds up, you feel bloated, you get constipated. Bile flows into the body, and you feel good, and the world looks better.

A new bowel movement doesn't always get rid of the bile. You need a medicine that works on the liver as well. It takes those good, old, reliable Little Liver Pills. They get the bile flowing freely and make you feel "dandy." Millions of people have made the bile flow freely. They do the work that the liver can't do. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. See.

Diamonds Are Priceless

Famous Mysore Gems May Be Worth A Billion Dollars

The famous Mysore diamonds were worn by the Maharajah of Mysore at a tea party which he gave 282 of his Anglo-Indian friends in London. It was the first time they had been worn outside his own state.

As large as swallows' eggs, the 25 perfectly matched gems lay on a fine chain against the Maharajah's tunic of black gabardine. They did not glitter. They were too big. The Mysore diamonds cannot be priced. They may be worth a billion dollars. The Maharajah wore other jewels besides the Mysore diamonds. In each ear glittered a huge diamond. An emerald half an inch square hung from his left hand. His turban of gold thread cost \$1,050.

Is Well Informed

London's Finance Committee Knows All About Canadian Titles

Regina citizens were just about bowled over when Alderman Whittingham, Chairman of the City of London Finance Committee, started to tell them where Regina stood financially. The alderman was with the Lord Mayor of London's party touring Canada.

Alderman Whittingham said they were quite pleased with Regina's financial position and he was able to tell Mayor Ellison some points about Regina's city financing. They keep close tabs on these things in financial London and they are frequently more conversant with the actual figures than are members of the councils of the cities concerned.—Windsor Star.

New Windshield Glass

Screens Out Headlight Glare Without Impairing Driver's Vision

The latest development in highway safety, a "glareless" windshield glass, was disclosed at the convention in Buffalo of the Illuminating Engineering Society.

L. W. Chubb, research director of the Westinghouse Electric & Manufacturing Co., described the development.

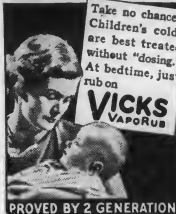

Designers of the glass claim it will eliminate one of the greatest causes of automobile accidents by "screening out" the glare of oncoming headlights without impairing the driver's vision.

Canada's Fire Losses

Fire losses in Canada during the week ending September 30 were estimated by the Monetary Times at \$192,300 as compared with \$232,000 the preceding week and \$98,450 the corresponding week last year. Fire losses from January 1 to September 30 this year totalled \$10,045,350 as compared with \$8,919,225 for the same period last year.

Crooning might be classed as "twing" music. Some authorities, however, opine it calls for more severe punishment.

PROVED BY 2 GENERATIONS

Creating Pasture Lands

Research Has Done Much For Welsh Mountain Area

Scientists working at the plant-breeding station of the University of Wales, have almost completed experiments in breeding grasses which will stand the rigors of Welsh mountain climate.

There is a dearth of suitable pasture land in Wales, but nearly 20 years' research now makes it possible to produce pastures in strange places.

One outcome of the labors will be to facilitate all-season crops of strawberries, raspberries, apples, pears, and vegetables, normally available only during a few weeks in the year.

Helped Build A Church

Tiger Skin Was Presented To Missionary In India

The "tiger skin that built a church," was on exhibition at Chalmers church, Ottawa, where the seventh General Council of the United Church of Canada was in session. The double-striped skin, presented several years ago to Rev. H. H. Smith, missionary at Sitamarhi, Northern India, by the Subah Sahib, of Mauddasaur, was sold when Mr. Smith found himself short of funds with which he intended to build a new church. It brought \$700, enough to allow completion of the church.

Things Are Reversed

Instead of people watching the animals feeding in the London zoo, the animals are sitting back in their cages and watching people eat. Giraffes, tigers and baboons can now see the fashionable Mayfair dining on the restaurant balcony and taking light refreshments in the floodlit gardens. It is London's nearest approach to a Continental beer garden.

Show Your Hand in Smart Crochet

PATTERN 5710

Nippy days, warm ensembles, bid you show your hand in smart crochet, and more particularly, in these gracefully styled gauntlets. They work up fast, for two identical pieces, crocheted lengthwise, form the hands. The smart, flared cuffs in simple rib stitch, are done extra, a bit of contrasting yarn adding a touch of color. In pattern 5710 you will find directions for making these gloves; an illustration of them and of all stitches needed, material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

OCTOBER 18

THE SPOKEN AND THE WRITTEN WORD

Golden text: The word of God is living and sharper than any two-edged sword. Hebrews 4:12.
Lesson: Acts 17:1-15; Thessalonians 2:1-12.
Devotional reading: Psalm 119:9-16.

Explanations And Comments

Successful Evangelism at Thessalonica, Acts 17:1-4. Although at Philippi we had suffered greatly, and had been innsulted, yet on we came to your city and boldly declared to you the gospel of God in spite of great opposition—in some such words Paul later wrote to the Thessalonians (1 Thess. 2:2). On the way Paul and his companions passed through the cities of Amphipolis and Apollonia. At Thessalonica they tarried several months, as we know from Paul's letters, but Luke, our historian, gives an account of Paul's preaching for only three successive sabbaths. There was a synagogue here and in it these Sabbath Paul "reasoned from the Scriptures," that is, cited scriptural passages which were prophetic of the Christ; and then showed that Jesus fulfilled these prophecies, that it behooved the Christ to suffer and to rise again from the dead. Thus he reasoned, or argued, that the Jesus whom he proclaimed to them was the Christ.

The result of Paul's preaching was that some of the Jews, many of the devout Greeks (Greeks who attended the synagogue and worshipped God), and many of the chief women were convinced of the truth of his message and "consoled with Paul and Silas," cast their lot in with their teacher and shared their way of life. They were afterwards zealous in extending the good news Paul brought to them, for in his letter Paul says, "From you hath sounded forth the word of the Lord, not only in Macedonia and Achaia (Greece), but in every place your faith to Godward is given forth."

On to Berea, Acts 17:10-12. Paul and Silas left Thessalonica at night. They continued their way westward to the city of Berea. There in the synagogue they found unprejudiced Jews who were willing to give his message a fair hearing.

Finding that Paul's words and the prophecies were in agreement, many of the Berean Jews believed, as did also many of the Greek women of honorable estate, and many of the Greek men.

Knows His Own Home

"The Jeep," mascot of the R.M.S. Naacole, may be just another cat to some folks, but he knows when his home port is reached. Taken on at Halifax when still a kitten "The Jeep" steadily returned to its home at any port of call. When the boat reached Halifax he was the first down the gangplank.

A genius is a man who can do almost anything—but make a living.

I'VE GOT TO SCRUB OUT THE TOILET BOWL AND HOW I HATE IT

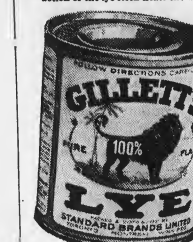

BETTER USE GILLETTE'S LYE AND FLUSH OFF THE STAINS

NO NEED TO RUB AND SCRUB

Gillett's Pure Flake Lye takes off those ugly yellow stains and won't harm enamel or plumbing. Once a week pour it full strength down toilet bowls and drains. It kills germs, banishes odors as it cleans. Frees trap and drainpipe from obstructions. And use Gillett's Lye in solution* for all kinds of heavy cleaning tasks. It eats dirt. Saves you hard work. Always keep a tin on hand!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells dozens of ways this powerful cleanser and disinfectant makes housework easier. Also tells how to make good soap at home and gives helpful information on farm sanitation. Write for a free copy to Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

An Important Discovery

The cause of cataracts, which has baffled the medical world for centuries, may be a step nearer solution with the discovery by Dr. Agnes Fay Morgan, chairman of the Department of Household Science at the University of California, that certain food extracts have a material effect on the eye malady.

Death of Mrs. R. Carson

Word was received by Mr. and Mrs. Rippon on Wednesday of the death of Mrs. Carson, known to many friends here as Marjorie Powell, daughter of Mr. G. R. and the late Mrs. Powell, which occurred in Winnipeg after several weeks illness. The funeral will be held on Friday in Calgary, and W. L. Rippon and H. C. McBurney will attend as pallbearers, besides which several friends from Coleman will attend. A detailed report will be given next week.

BORN—To Dr. and Mrs. Blair on Saturday, Oct. 10, a son.

The Coleman Board of Health NOTICE

In view of the appearance of several new cases of Scarlet fever, the Board of Health would appreciate it, if the parents would notify the medical health officers if any sickness appears in the home among the children before sending them to school, and much inconvenience to all concerned would be prevented.

DR. R. K. McLEAN,
Medical Health Officer.

Alberta Newspaper Publishers

(Continued from Page 1)

various representatives of the dailies, and the guest speaker was Mr. Paul Reading, talented executive editor of the Calgary Herald, whose experiences in important capitals of the world formed the basis of his address. The convention closed on Saturday afternoon when the following executive was elected: G. C. Duncan, Drumheller Mail, immediate past president; H. T. Halliwell, president; F. P. Galbraith, Red Deer Advocate, first vice-president; Ralph C. Jessup, Macleod Gazette, second vice-president; C. L. Dunford, Sylvan Lake News; H. J. Ford, Lacombe Globe; R. L. King, Claresholm Local Press, executive committee.

The most important resolution of public interest was forwarded to Premier Aberhart following the convention:

TEXT OF RESOLUTION

Honorable Sir:

The Alberta Division of Canadian Weekly Newspapers Association in convention in Calgary Oct. 9 and 10, 1936, wishes to file a formal protest with you against the misrepresentation of the aims and objects of Alberta newspapers as a whole, which has been taking place ever since your government assumed office, and against unwarranted charges that the independent newspapers of the province, meaning those which are not official organs of a political party, follow the practice of deliberately misrepresenting the news and of deliberately publishing untruths for the purpose of influencing public opinion.

In the opinion of this meeting there is no foundation for such charges and if in your opinion such deliberate misrepresentation and publication of untruths has taken place we respectfully request that you or other offended parties seek redress in the courts under the existing laws, or state to what articles and what newspapers you refer, so that newspapers as a whole may cease to be placed in the unfair light in the eyes of the public in which they find themselves today.

Signed:

H. T. HALLIWELL, President
Alberta Division C.W.N.A.
Coleman Journal.
H. G. McCREA, Hanna Herald,
Secretary.
